www.kenniesit.com

ABOUT US

Kennies IT is a Tier III data centre specializing in end-to-end construction and operational management, offering reliable and scalable solutions for businesses. Designed with advanced infrastructure, including redundant power systems, energy-efficient cooling, and robust disaster recovery (DR) mechanisms, it ensures 99.99% uptime and seamless connectivity.

Kennies IT is your trusted partner for navigating the dynamic world of Data Centers, Scalable Cloud, AI, and IoT. It focuses on facilitating digital transformation through AI-enabled platforms and infrastructure, promoting scalability, productivity, and security across hybrid IT environments. Kennies IT offers holistic models to support digital optimization goals, emphasizing agility and flexibility in service delivery through its core verticals—**Kennies IT DC**, **Nublar Bharat Cloud**, and **Kennies AI**.

MISSION

At **Kennies IT data center**, we are committed to making a data ecosystem where data remains easily accessible, scalable, and reliable.

Delivering Excellence

Championing Sustainability

Enhancing Connectivity

Driving Innovation

Nurturing Community Growth

VISION

(1) Strategic Objectives

- 5 units Edge Data Centers Rollout
- Incorporating renewable energy to reduce carbon footprint

(2) Market Expansion Plan

Hyperscale Data Centers

Pune

Hyderabad

Bangalore

Edge Data Centers

DATA CENTER SERVICES

Enterprise Hosting

- Dedicated Server
- VPS Hosting
- Virtual Machine
- Disaster Recovery
- Managed Database
- Corporate Email

Cloud Hosting Services

- Multi Cloud Hosting
- Cloud CDN
- Public Cloud
- Private Cloud
- Hybrid Cloud
- Cloud Storage
- Cloud Backup

Server Colocation

- Single Server
- Cabinet Colocation
- Rack Space Colocation
- Cage Colocation
- 1 U Colocation

Managed Hosting

- Bare Metal Server
- Monitoring
- Tech Support
- Reporting
- Security
- Backup

Data Center Infrastructure

- End-to-End Data Center Integration
- Turnkey Data Center Solutions
- Edge Data Centers
- High-Availability Architecture Design
- Private Data Center Development

Network & Connectivity Services

- High-Speed Data Center Networking
- Software-Defined Networking (SDN)
- Content Delivery Network (CDN) Services
- Data Center Interconnect (DCI)
- Network Traffic Optimization & Load Balancing

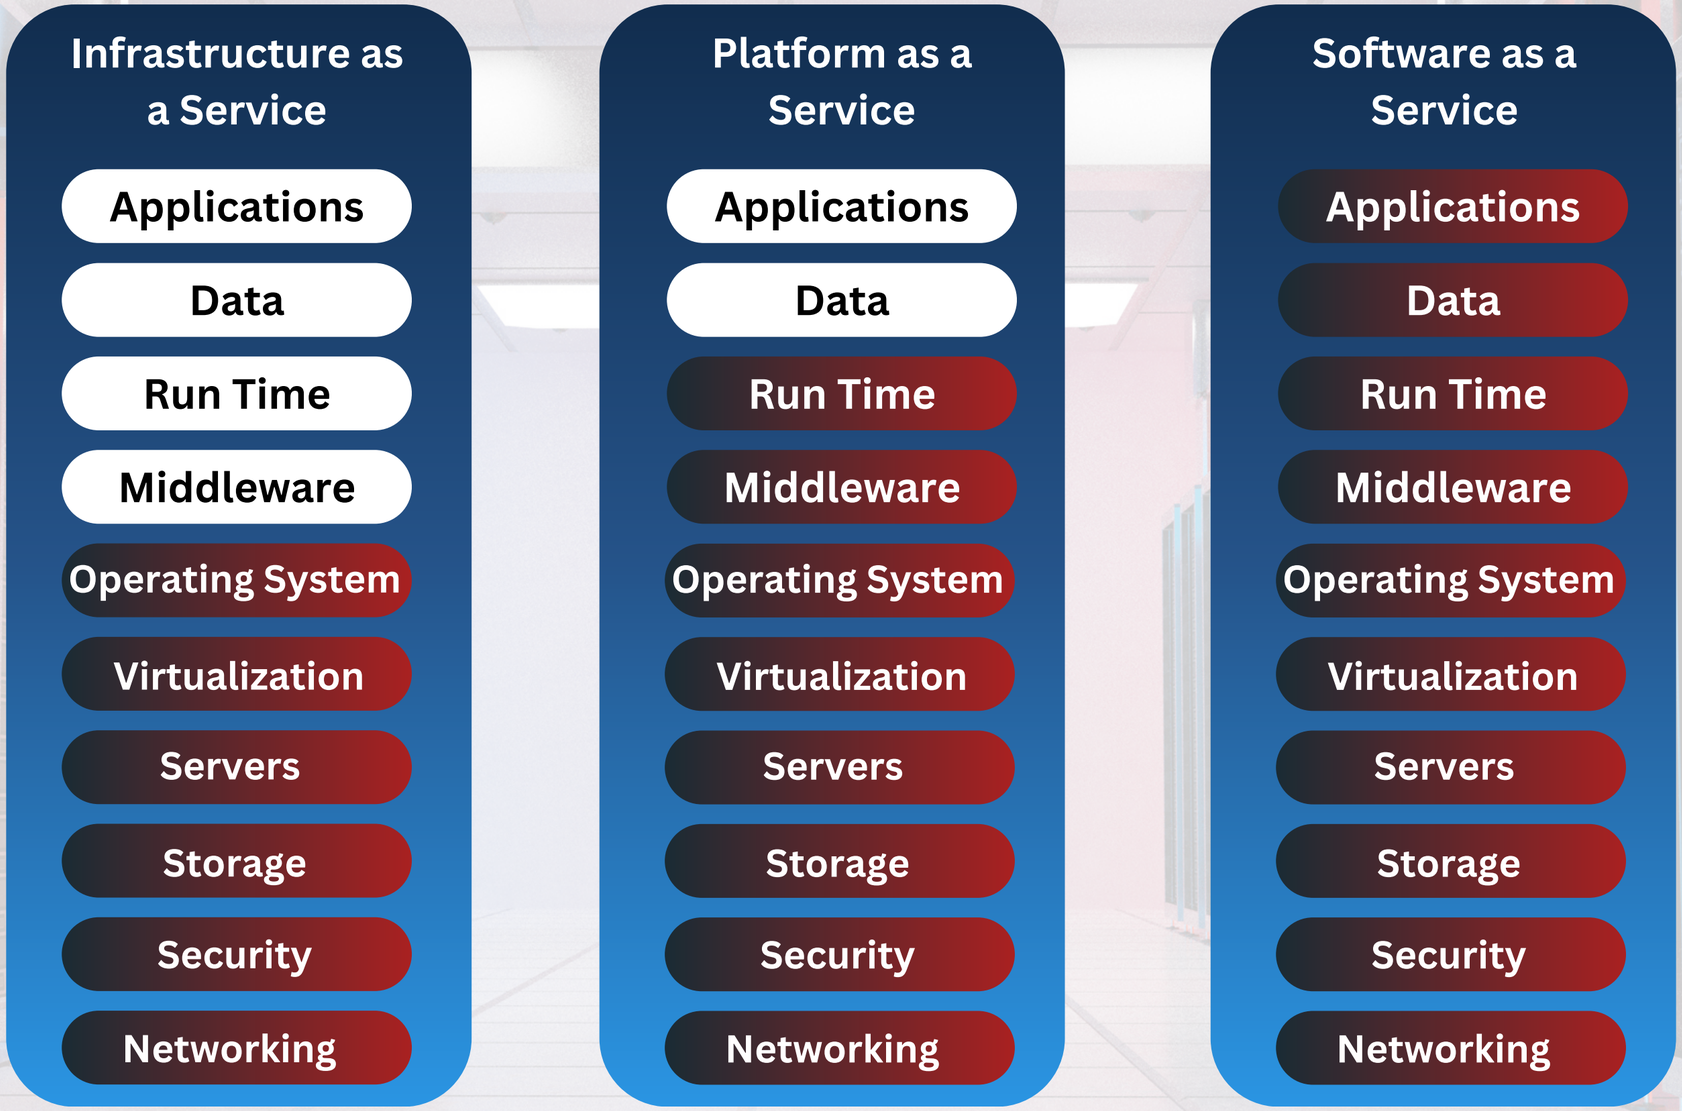
Compliance & Synchronization Services

- Regulatory Compliance Consulting
- Data Encryption & Protection
- DDoS Mitigation & Cybersecurity
- AI-Driven Threat Detection
- Data Replication & Synchronization

Custom Infrastructure Development

- Tailored infrastructure design
- Disaster Recovery Site
- Resilient system development
- Containerization and microservices architecture
- Kubernetes and container orchestration

DATA CENTER SERVICES MODELS



Self Management

Managed By Service Provider

NUBLAR BHARAT CLOUD SOLUTION

Likewise the name ‘Nublar’ we at Kennies will make the cloud hosting solutions ‘to cloud’ where Sky is the limit! Nublar Bharat can transit businesses to cloud infrastructure to scale & grow!

Nublar Bharat For Innovation & Excellence

Bless Your Business With Blazing-fast loading, cost saver, scalable, unmatched reliability, and highly secured cloud hosting solutions. For **IaaS, PaaS, and Saas**, our solutions will serve with the best technicalities!

NUBLAR BHARAT CLOUD SERVICES

01

Hybrid Cloud Architecture

- On-premise integration
- Multi-cloud management
- Workload distribution
- Environment synchronization
- Cross-platform security

02

High-Performance Computing

- GPU-accelerated instances
- Bare metal solutions
- Low-latency configurations
- Memory-optimized clusters
- Scientific computing platforms

03

Managed Cloud Security

- Intrusion detection & prevention
- DDoS protection
- Data encryption
- Vulnerability scanning
- Compliance monitoring

04

Cloud-Native Development Platform

- Container orchestration
- Serverless computing
- Microservices support
- CI/CD pipeline integration
- DevOps toolchain

05

Disaster Recovery Solutions

- Automated backups
- Geo-redundant storage
- Failover configuration
- Recovery time optimization
- Business continuity planning

06

Edge Computing Solutions

- Global edge network
- Content delivery acceleration
- IoT data processing
- Low-latency applications
- Distributed computing

TRANSFORMING BUSINESSES WITH KENNIES AI SOLUTIONS

At Kennies, we combine the power of AI and IOT to develop intelligent, data-driven solutions that enhance business operations and decision-making. Our team of AI specialists, data scientists, and IOT engineers work together to create integrated systems that harness the power of real-time data, automation, and machine learning.

Our core competencies include:

PREDICTIVE MAINTENANCE

AUTOMATION AND SMART CONTROL SYSTEMS

ADVANCED CV & NLP

PERSONALIZED AI SOLUTIONS FOR INDUSTRY-SPECIFIC NEEDS

EMPOWER YOUR BUSINESS WITH AI SOLUTIONS

01

Customer Engagement (GenAI-Powered)

AI Chatbots & Virtual Assistants – Answer customer queries instantly.
AI-generated Personalized Emails – Higher conversions, better engagement.
Automated Social Media Content – Never run out of fresh content.
AI-Powered Sentiment Analysis – Understand customer emotions.

02

AI for Sales & Marketing

AI-Generated Product Descriptions – Faster online store setup.
Smart Ad Targeting – Higher ROI with precise audience segmentation.
AI-Powered CRM – Automate follow-ups.
Chatbots for Lead Generation – Engage potential customers.

03

AI for Business Automation

AI-Powered Document Processing – Automate invoices, reduce manual errors.
AI Voice Assistants – Schedule meetings, manage emails, boost productivity.
Automated HR & Recruitment – Hire the right talent faster with AI screening.
AI-Powered Workflow Automation – Streamline mundane tasks.

04

AI for Operations & Decision-Making

Predictive Inventory Management – Optimize supply chain.
AI-Powered Financial Insights – Track cash flow, detect fraud.
AI in Manufacturing – Predict machine failures, reduce downtime.
Inventory Forecasting – Demand prediction accuracy.

05

Unlimited Possibilities with Kennies AI

AI-Based OCR Documents – Automated text extraction.
Predictive Maintenance – Equipment failure prevention.
AI-Powered SaaS – Intelligent cloud automation.
ERP with AI – Optimized business operations.

MULTIPLE REDUNDANT POWER SUPPLY

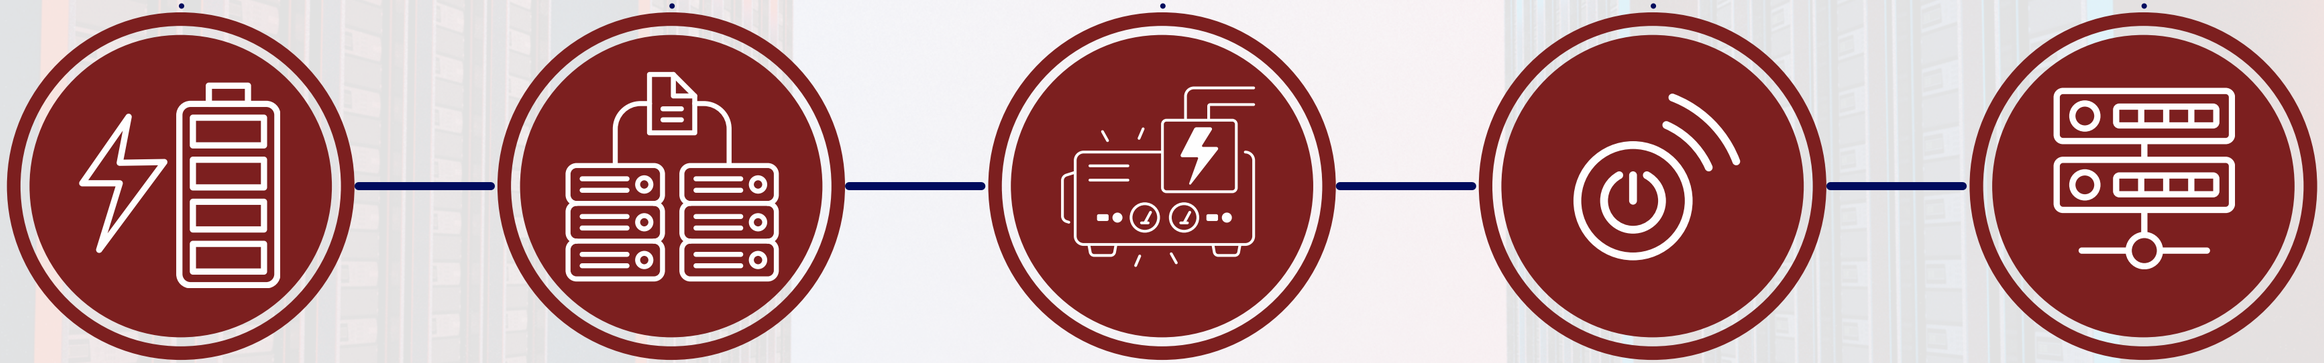
UPS with N+N Redundancy

N+1. Redundant Electrical Design & Distribution

N+2 dual Diesel Generators

Automated switch from primary to back-up source!

Dual PDU power feed sources to each Rack



COOLING

1. Air Cooling system with N+2 precision AC Management temperature and humidity
2. In-row cooling cold ailed containment solutions with smart IOT sensor
3. Complete humidity-controlled environment
4. In-House PAC Technology for advanced precision cooling tailored for high-density data centers.

FIRE PROTECTION

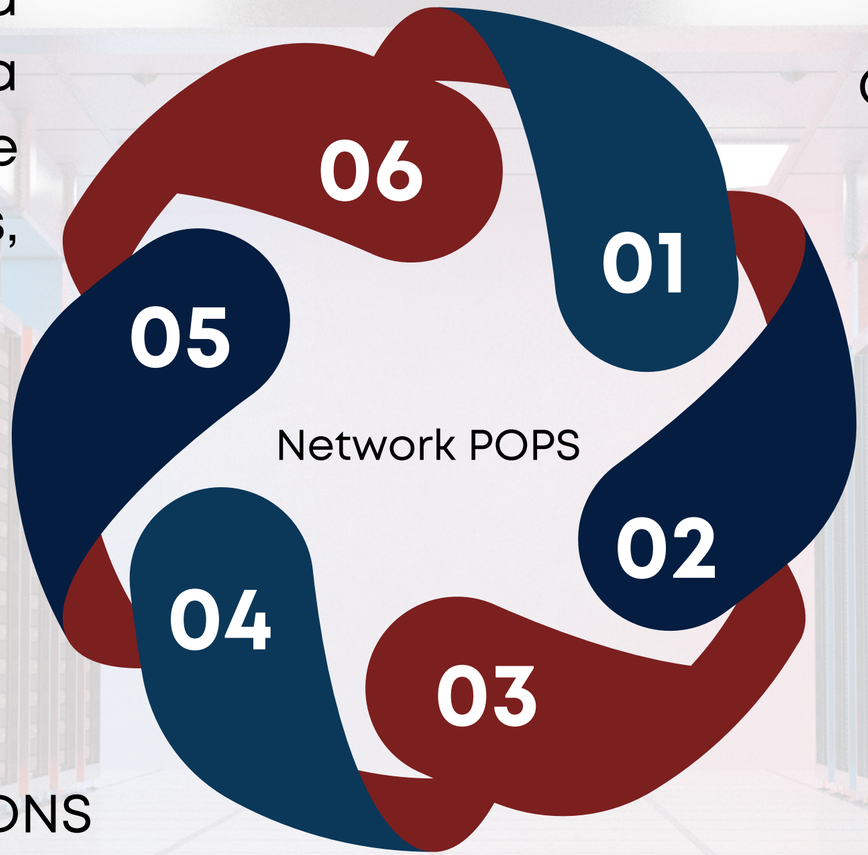
1. High speed laser, very early smoke detection (VESDA) system
2. NOVEC 1230 fire suppression system
3. Advanced fire alarms and aspirating smoke sensors
4. Gas-based fire suppression systems (clean agent systems)

NETWORK

Bandwidth from all Major Service Providers Tata Communications, Tata Teleservices, Airtel, Reliance Communications,

Hosting CDN Edge Servers with our technology partners

Hosting all major DNS Root Servers in India



Carrier Neutral Network

Best in class internet service and uptime

Telcos connect on Resilient fiber for cross connect

SEVEN LAYERS OF ROBUST SECURITY

DFMD & Boom Barrier

24x7 On-site security presence

Biometric Access for entry & exit

Boundry wall and Fencing

24x7 surveillance cameras with storage back-up upto 60 days

Building Access- Government recognized KYC

Alarm & Fire Detection with automated notification

CORE VALUES

Offering advanced data center solutions

Consistent performance with 99.95% uptime.

Offering compliance and secure infrastructure.

Focused on eco-friendly operations.

KEY COMMITMENT

Customized services for unique business needs

01

Dedicated 24*7 technical assistance

02

Infrastructure that grows with your business

03

Hassle-free transition to various services

04

WHY CHOOSE KENNIES DATA CENTER?

RELIABILITY

Kennies Data Center aims to utilize next-gen hardware and technology to assure high performance and reliability. With solid infrastructure and redundant systems,we assure minimal downtime and optimal uptime.

EXPERT SUPPORT

The professional support team at Kennies is easily accessible 24*7 to answer your queries and provide direction. Moreover, we ensure to keep your business operations running smoothly without interruptions.

DATA ENCRYPTION

Security turns out to be one of the most important aspects for any kind of business. Kennies assists comprehensive security measures involving advanced firewalls, DDoS protection, regular security audits and 24/7 monitoring.

ECONOMICAL SOLUTIONS

Kennies Data Center provides competitive and transparent pricing models customized for multiple business requirements. The cost-effective plans assure that you get the best value for your investment without hidden fees.

EASY INTEGRATION

The hosting solutions are designed for easy integration with multiple Windows based applications and services. The user-friendly control panel and management tools simplify the process of managing your hosting environment.

UP-TIME

Kennies IT Data Center ensures 99.99% uptime, keeping your business online 24/7. Our advanced infrastructure and robust systems guarantee seamless reliability. With dual power supply management.

KENNIES IT: A PROVEN PARTNER IN INNOVATION

Kennies IT has a proven track record in delivering innovative IT solutions and infrastructure. With our expertise in managing large-scale projects, including data centers, disaster recovery solutions, and ERP implementations, we are a reliable partner to bridge the gap between policy vision and ground-level execution.
